Nuclear Engineering and Design

Contents of Volume 147

CONTENTS OF ISSUE 147(1)

Extended and Updated Selected Papers from the ANNUAL MEETING ON NUCLEAR TECHNOLOGY '91 (JAHRESTAGUNG KERNTECHNIK '91) May 14–16, 1991, Bonn, Germany

Preface, *K. Kussmaul* ix

Results of the verification period 1985–1990 of the German–Swiss high converting reactor PWR-C1, *R. Brogli, H. Moldasch and I. Rummel* 1

Experiments on the enrichment of cesium in the cover gas aerosol of the European Fast Reactor EFR, *J. Minges and W. Schütz* 17

Perspective channel-type reactor with enhanced safety, *E.O. Adamov, I.I. Grozdov, S.P. Kuznetsov, A.A. Petrov, M.I. Rozhdestvensky and Yu.M. Cherkashov* 23

After heat removal by a closed secondary cooler circuit on the example of the advanced high temperature reactor AHTR 500 with central graphite column, *U. Klein, J. Singh, H. Barnert and H. Hohn* 29

Temperature equalization phenomenon in a high temperature reactor core with central column, *S. Drecker, J. Singh and H. Barnert* 39

Numerical prediction of stratified pipe flows in PWRs, *Y. Abou-rjeily and G. Barois* 47

Comparative studies on high-temperature corrosion of ZrNb1 and Zircaloy-4, *J. Böhmert, M. Dietrich and J. Linek* 53

Creep rupture strength and creep tests on the EFR structural material 316L(N), DIN 1.4909, *M. Schirra* 63

Experiments and calculations on crack opening and leak rate of a pipe branch within the HDR-Program, *H. Grebner, H. Hunger and A. Höfler* 79

Reactivity feedback evaluation of material relocations in the Cabri-1 experiments with fuel worth distributions from SNR-300, *P. Royl, W. Pfrang and D. Struwe* 85

Metallic core internals of the modular HTR, *H. Rothfuss, D. Stausebach and M. Ullrich* 93

Measurements to distinguish fuel elements with and without thorium content by gammaspectrometry in hot cells, *R. Duwe, W. Kühnlein and R. Schröder* 101

FOCUS-type fuel assembly for PWRs, *F.-W. Aisch, H.-P. Fuchs and H. Lettau* 105

Detection of alpha emitters in solidified radioactive waste, *P. Filss and R. Enge* 111

Chemical cleaning of PWR steam generators with a low temperature process, *H. Förch, T. Oliver and W. Hertle* 115

Calculation of neutron dose rates including backscattering of a POLLUX cask in drifts of a repository mine, *H.-J. Engelmann, M. Khamis and J. Lempert* 119

Instructions to contributors 125

CONTENTS OF ISSUE 147(2)

Extended and Updated Selected Papers presented within Division M on STRUCTURAL RELIABILITY AND PROBABILISTIC SAFETY ASSESSMENT during SMiRT-11, Tokyo, Japan, August 18–23, 1991 Guest-Editor: G.I. Schuëller

Preface, *G.I. Schuëller* i

A proposal for safety factor estimation in seismic PSA of structure by stochastic FEM technique, *T. Mochio* 129
Statistics of cumulative damage parameters based on hysteretic energy dissipated, *J.A. Pires* 141
Probabilistic evaluation of lateral extent of soil liquefaction under earthquake loading, *J.A. Pires, A.H.-S. Ang and I. Katayama* 157
An analytical method for leak before break assessment based upon stochastic fracture mechanics, *A. Tsurui, H. Tanaka and T. Tanaka* 171
Fragility estimation of an isolated FBR structure considering the ultimate state of rubber bearings, *K. Hirata and T. Somaki* 183
Evaluation of response factors for seismic probabilistic safety assessment of nuclear power plants, *K. Ebisawa, K. Abe, K. Muramatsu, M. Itoh, K. Kohno and T. Tanaka* 197
A study on the applicability of the response estimation of a PRA procedure, *M. Mizutani, M. Takeda, Y. Kai and M. Matsubara* 211

Instructions to contributors 231

CONTENTS OF ISSUE 147(3)

A new stochastic analysis for multiple supported MDOF secondary systems: I. Dynamic interaction effects, *A. Saudy, T. Aziz and A. Ghobarah* 235
A new stochastic analysis for multiple supported MDOF secondary systems: II. Tuning and spatial coupling effects, *A. Saudy, T. Aziz and A. Ghobarah* 251
Seismic mitigation of structures by using viscoelastic dampers, *W.Q. Li and C.S. Tsai* 263
An analytical study on the pump-induced acoustic pressure in a pressurized water reactor, *K.B. Lee and I.Y. Im* 275
Stress analysis of heated concrete using finite elements, *P. Majumdar, A. Gupta and A. Marchertas* 287
A new algebraic white-noise modal combination rule – GAC(A), *P.G. Mertens* 299
Dynamics of shut-off rod drop in a PHWR, *S.S. Taliyan, D.P. Roy, R.B. Grover, M. Singh and G. Govindarajan* 311
BWR control rod drive system aging, *R.H. Greene* 321
A comparison of the use of the modified *J*-integral and the deformation *J*-integral in procedures for estimating the critical crack length for CANDU pressure tubes, *E. Smith* 337
Snubber aging assessment, *D.P. Brown, D.E. Blahnik and J.J. Burns, Jr.* 351
Application of first and second order reliability methods in the safety assessment of cracked steam generator tubing, *L. Cizelj, B. Mavko and H. Riesch-Oppermann* 359
Inservice measurements on piping systems and components in nuclear power plants, *P. Hofstötter* 369
Detecting and mitigating aging in component cooling water systems, *R.J. Lofaro* 375

Insights from the AP600 probabilistic safety study, *V. Cavicchia, A. Bassanelli, E. Traini, S.D. Kopelic, N.J. Liparulo and D.R. Sharp* 385
Improving importance sampling method in structural reliability, *W.-L. Jin and E. Luz* 393
Streamed spectra of fast neutrons through airducts in concrete, *B.S. Seshadri and R. Venkatesan* 403
Natural circulation experiments with a VVER reactor geometry, *S.W. Lomperski and J. Kouhia* 409
Experimental and analytical study of direct contact condensation of steam in water, *K.-S. Liang and P. Griffith* 425
Neutron flux and reactivity calculations for an optimized arrangement of experimental facilities in a research reactor, *F. Gallmeier and E. Steichele* 437

Technical notes
A small bore piping design expert system, *Y.L. Mo* 447
The development of a diagnostic and monitoring system for vibrating pipe branches, *T. Tanaka, S. Suzuki, Y. Nekomoto and M. Tanaka* 455

Announcements
